

Feature Comparison: Marshee vs TryFI

Feature	Marshee	TryFI
Battery Capacity	350mAh @ 3.7V	520mAh @ 3.8V
Typical Battery Life	7–10 days (current usage)	OTA-only Wi-Fi)
90–120 days		
Sampling Rate	Every 200ms	Every 5–10 sec
Activity Classification	Local lightweight + cloud	Local + cloud (Fi AI Cloud)
Motion Detection	Yes, local (ESP32 IMU)	Yes, ML models on accelerometer
GPS	BLE echo only	On-demand GPS
BLE Usage	Frequent: real-time sync to mobile	Beacon-only, wakes on app/device
Wi-Fi Usage	OTA-only (disabled rest of time)	Home Wi-Fi only, during charging
Sleep Mode	18 hrs/day (inactivity-triggered)	95–98% of the time
Data Upload	Real-time over BLE or buffered when offline	Periodic + during charging
OTA Updates	Over Wi-Fi	Over Wi-Fi/dock
Offline Mode	Stores in .json or binary	Buffers light/raw data
Beacon Reconnection Logic	Yes, with firmware	Yes, wake-triggered
Cloud Processing	—	Heavy cloud AI
Live Tracking	Yes via BLE echo + mobile	Yes via GPS + LTE-M
Map Building	Yes, via coordinate echo	Yes, GPS auto-logging
Activity Tags	Active, sleep, walk, rest etc	Same
Charging Interface	Pogo pins	Magnetic base
Sleep Entry Mechanism	Based on inactivity	Based on time + activity rules
Charging Trigger for Uploads	Not used	Primary sync during charging
Extra Battery Optimization	Sleep + OTA-only Wi-Fi	Aggressive BLE/Wi-Fi shutdown, LTE fallback
OTA Trigger	Manual OTA via app or Wi-Fi	Triggered when docked
Power-Hungry Ops	Real-time BLE sync	GPS + LTE burst (rare)
