Dear Meet Jain,
College ID:22ECUOS038

SUBJECT: OFFER FOR INTERNSHIP

We are pleased to offer you the position of **Firmware Development Intern at Marshee Pet Technologies**, starting on **May 5 2025**. This internship will span 2 months concluding on 28th June 2025 and will provide hands-on experience with real-world project management, firmware development, communication with hardware companies and an opportunity to develop key skills in code writing, testing, debugging and teamworking.

Please find below a list of Responsibilities:

- **Code Writing:** Write clean, maintainable, and efficient code, adhering to best practices in software development.
- **Algorithm Design:** Develop algorithms for specific tasks required by the firmware, such as communication protocols or control systems for embedded devices.
- **UI/UX Implementation:** Collaborate with designers to translate wireframes and mockups into functional user interfaces, ensuring usability and aesthetic appeal.
- **Debugging and Testing:** Identify and fix bugs during development and testing phases, ensuring the application is stable and performs well under various conditions.
- **Documentation:** Produce clear documentation for codebases, enabling other developers to understand and contribute to the project effectively.
- **Collaboration:** Work with cross-functional teams, including security, engineers, and business analysts, to understand project requirements and deliver results.
- **Research and Learning:** Stay updated on the latest advancements in data science and machine learning to enhance skills and knowledge continually.
- **Confidentiality and data security:** You shall be responsible for maintaining absolutely confidentiality & secrecy about the developments and IP so developed for the company.

In this role, you will be responsible for working with the team on all aspects related to the founders office and firmware development. Your key skills especially those in GPS will be pushed forward and we expect you to further add a layer of BLE beacon technology and WIFI/ UWB based location tracking. These have to be done in close collaboration with all mentors and team members. Complete confidentiality will have to be maintained about your work and data security shall be imperative. You will be expected to monitor feedback, engage with the Marshee team members, and ensure a positive experience for all. Please find enclosed below a list of desired qualifications that we desire and envisage you having these in order to fulfill the responsibilities, those not present at this time can be taken up:

- **Degree:** Have a degree or are currently enrolled in a Bachelor's or Master's program in Computer Science, Information technology, Programming or a related field.
- **Proficiency in programming languages** such as C/C++.
- **Familiarity with embedded operating systems** (e.g., FreeRTOS, Embedded Linux).
- **Strong analytical skills** for troubleshooting complex issues.
- **State Management Techniques:** Familiarity with various state management solutions like Provider, Bloc, or Riverpod to manage app state effectively.
- **Debugging and Testing:** Developing skills in debugging applications and implementing testing methodologies, including Test-Driven Development (TDD).

- Analytical Skills: Strong problem-solving abilities and experience with statistical analysis.
- Communication Skills: Excellent written and verbal communication skills for effectively conveying technical information.

You will report directly to Mr. Saksham Chauhan, however feel free to reach out to the undersigned or Mr. Aseem Gupta, for guidance and support throughout the internship. We expect you to adhere to our company policies and maintain a professional and respectful attitude in all interactions.

Kindly confirm your acceptance of this offer by signing and returning this letter by April 13th. If you have any questions or need further clarification, do not hesitate to contact us. It is requested to kindly start the workday as early as possible and latest by 10.30 a.m.

Please also note:

- Working hours: 6 days a week with a weekly commitment of 48 hours, second Saturdays are off.
- Mandatory company huddle: Twice a month on 1st and 3rd Saturdays
- Reimbursements: At actuals
- Placement offer: During the internship itself for a salary with option of ESOPs, if viable.
- Certificate: Provided for the period served and tasks completed.
- Task completion reports to be submitted every 2 weeks. This is necessary for disbursement of stipend.

Yours Sincerely,
For Marshee (OPC) Private Limited

Signed and Accepted
